Mark Your Calendars!

Student Workshops at the Discovery Center:

November 18, 2011 9:30– 11:30am

January 27th, 2012 9:30—11:30am

Cost is \$10 per class. See the NIRSF website for registration details

• New this year: Team Division!

If you have a student who is reluctant to try the Science Fair but would find encouragement working as a team, we are pleased to add this to our list of entrant options. More details to follow soon.

• Visit our Website:

• Check our website for updated information, registration forms, and more.

We are so excited to be starting another year of planning for the NIRSF Home School Science Fair. Our mission is to give home educated students the opportunity to grow, learn, research, and present their scientific discoveries in a fair and competitive environment.

Now is the time to start thinking about participating! Get the ideas rolling and start thinking of ways to excite your students about experimenting with science. Our workshops at the Discovery Center are meant to help spark that fire.

Please let us know how we can encourage you and your students in this journey.

We look forward to seeing you at the workshops and at the Science Fair!
